

Curriculum vitae

Name	Ing. Martin Sladek
Date of birth	13 th November 1977
Residence	Prague, Czech Republic
Phone number	+420 777 026 277
WWW	www.martinsladek.com
E-mail	job@martinsladek.com

Professional Summary

Senior Full-Stack Java Developer with 18+ years of professional experience, strong backend expertise, solid frontend fundamentals and readiness to work with React. Experienced with cloud environments (Azure, AWS) and modern AI-driven development workflows (Claude Code, Cursor, GitHub Copilot). Strong engineering background including low-level programming (C/C++/asm), networking (CCNA), security basics and distributed systems. Actively adopting agentic AI tools to improve productivity, automation and code quality.

Education

2001 - 2007	University of West Bohemia, Faculty of Applied Sciences Informatics and Computer Science, domain Distributed systems, finished by state final graduation examination
1993 - 1997	The Secondary School of Electrical Engineering (SPSE Plzen) Electrotechnology, Computer technology, finished by graduation examination

Language knowledge

English	active, fluent
Czech	native speaker

Significant professional experiences

2025 – 2026 **Commerzbank, A. G.**

Senior Software Engineer – Market Data Repository financial applications.
Analysis and architecture of integrations (Summit, Murex – SCP/SFTP, SMB).
Java, Spring Boot, Microservices, Docker, Kubernetes, OpehShift OCP4, GCP.
Idea, Maven, Git, REST API, Java 21, Bash, Python.
AI-driven development – active usage of AI tools (Claude Code, Cursor, GitHub Copilot – agents, skills, workflows) for refactoring, debugging, code and test generation and architecture reasoning.

2023 – 2024 **Profinit**

Senior Java Engineer – analysis, development, architecture, integration
Implementation of new technologies – OCP, Cloud, Microservices
Various customers and clients – KB, Czech Savings Bank
Involved in modernizing development workflows, including adoption readiness for AI-assisted coding and cloud-native patterns.

KB (Komerční banka) – 2024

Senior Java developer – Card Transactions Reconciliation system.
Analysis of performance bottlenecks, microservices architecture adjustments, API redesign, data structures optimization, implementation of new module.
Java, Kotlin, Spring Boot, Microservices, REST, OpenAPI, Kafka, Docker,
Testcontainers, Kubernetes, Kibana, Jira, Confluence, Maven, Git
Oracle PL/SQL, H2, FlyWay
Applied AI tools in isolated workflows for code analysis, refactoring proposals and debugging strategies.

Czech Savings Bank (Česka Spořitelna) – 2023

Senior Java developer – Mortgage evaluation and processing application.
Analysis of requirements, architectural adjustments and improvements – integration, persistence, authentication, auto configuration.
Java, Kotlin, Spring Boot, REST, SOAP, Microservices, OpenAPI, Kafka,
MapStruct, WireMock, Feign, Docker, OpenShift OCP, Kubernetes, Kibana, Jira, Confluence, Maven, Bash, Git
Oracle SQL, H2, LiquiBase
Experience with frontend integration points and readiness to work with React-based UIs.

2018 – 2022 EPAM systems

Senior Java development, staffing, analysis, implementing new technologies
Application architecture workshop/class – From monolith to microservices – best practices, appropriate design patterns, horizontal scaling support.
Team leadership – technical interviews, knowledge transfer, scrum master
Various customers and clients – Barclays, S&P, SupplyOn, MSD
Exposure to AWS cloud (Barclays migration), distributed systems and automation workflows.

S&P Global – Standard & Poor's – 2020 - 2022

Senior software engineer – credit rating applications.
Architectural upgrade, migration from Solaris to Linux.
Development, deployment, migration, maintenance
Team leadership – interviewing, inter-team coordination, prioritization
Java, Oracle, Linux, Bash, Python, C/C++/ProC, Informatica, Maven, Git

Barclays Capital – 2018 - 2020

Senior Java developer – trading software development, migration and support
Migration from on-prem to AWS – architecting integration of on-prem and cloud modules, security architecture – modules authentication.
Java, Spring, Tibco/DataSynapse, AWS EC2, SOA, MQ, JMS, JSP, Oracle, MS SQL, Idea, Nexus, Maven, Ant, Python, Perl, Shell/Bash, Make, jUnit, Jenkins, Git
Cloud experience (AWS EC2) relevant for Azure-based development.

2015 - 2018 Commerzbank, A. G.

Software developer – evaluation and reporting trades to regulators

Java, Spring, JPA, Hibernate, SOAP, REST, JAXB, MQ, JMS, JSP, Thymeleaf, JBoss, WildFly, Tomcat, Linux Shell/Bash, Oracle PL/SQL, Eclipse, Idea, Maven, JUnit, EasyMock, Jenkins, Git

Experience with full-stack Java (JSP/Thymeleaf) – foundation for React readiness.

2011 – 2013 CA Technologies

Virtual assurance for infrastructure management

Software engineer – Development of monitoring and management software

Team leadership – Scrum master, inter-team coordination

C/C++, Bash, Linux (SLES, RHEL, Debian), DU, HP-UX, Solaris, SNMP

Products Integration - automated installation, virtualization, auto testing

Java - automating installation, configuration, integration, upgrade, testing

JUnit, JMockit - unit and integration tests, configuration scenarios

2008 – 2010 Seznam.cz

Czech Internet portal

Software developer – Corporate catalog Firmy.cz, Weather forecast Pocasi.cz,

Corporate information system (Ad scheduling, billing, CRM, sales, statistics)

C/C++, MySQL, Oracle PL/SQL, Python, PHP, Shell/Bash, Debian Linux

Broad full-stack experience (backend + frontend fundamentals).

Additional Skills

AI-driven development: active usage of Claude Code, Cursor, GitHub Copilot

Agentic workflows: prompt-driven refactoring, debugging, reasoning, test generation

Cloud: Azure readiness, AWS EC2 experience, OCP/Kubernetes

Frontend: React readiness (solid JS fundamentals, AngularJS background)

Strong engineering foundation: C/C++/asm, networking (CCNA), security basics, distributed systems

Fast learning curve and readiness to adopt modern AI-assisted development practices
